## Real Management Kft. has a new website

2011. October 07. [Real Management, property, real estate](#)

Not long ago, we announced that Real Management Kft., who nationwide manages more than one hundred thousand square meters of property, has positioned itself newly on the real estate market with the renewal of its name.

In the same time, the company's new web site has been completed, which has lately been released on the internet.

Regarding its content, the former site has been further developed, whereas in respect of its design, more attractive colors and a clearer structure now facilitate navigation.

During the past 12 years, Real Management Kft. participated in the preparation of several different Hungarian and foreign real estate developments as well as in various other phases reaching from property acquisition, letting and operational/ facility management to sale and the connected advice services. Visitors of the new website can find these properties under the menu point References. Separate from this, developments on which the company currently is working, are arranged according to types under the link Our projects. The data sheets of each real estate comprise all important parameters including the respective tasks delivered by Real Management Kft.

Under the menu point Press, publications in context with the company or its developments are listed.

Additionally, the site has been complemented by an introduction of further services provided by Real Management Kft. which gives visitors an insight into the company's activities. Any related further information is gladly given by the responsive colleagues, whose contact data are also specified on the page.

The web site left behind its static character; its contents expanded and according to the plans, will continue doing so - insofar, it will be worthwhile to revisit the site from time to time.

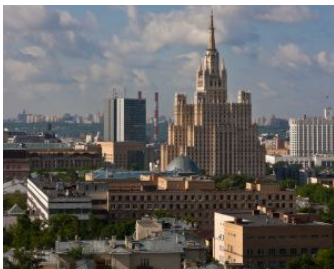

appearance: 2011. October 07.
